

CHITRAKSH SENGAR

Curious by nature.
Building by choice.

COMPUTER SCIENCE · VIT VELLORE

I hail from Mumbai, a city that rewards curiosity, resilience and the willingness to keep moving. I'm pursuing B.Tech in Computer Science Engineering (CSE Core) at VIT Vellore, where I'm learning to turn ideas into useful technology and build a strong foundation in software development.

01 / LEARN

Stay curious

02 / BUILD

Make useful things

03 / GROW

Improve every day

A little about me

I'm an early-stage builder with interests that sit at the intersection of technology, creativity and problem-solving. I enjoy understanding how things work, experimenting with ideas and learning by doing. Alongside computing, experiences in research, student leadership and public speaking have helped me become a more thoughtful communicator and teammate.

EDUCATION

Vellore Institute of Technology (VIT), Vellore

B.Tech — Computer Science Engineering, CSE Core | 2026–Present

ACADEMIC FOUNDATION

97.8%

Class 10 result
School Topper

CSE CORE

Current undergraduate focus
Software and computing

WHAT I BRING

Curiosity

I like asking questions and learning beyond the minimum.

Initiative

I learn by building projects and taking on new challenges.

Communication

MUN, event hosting and drama have helped me present ideas.

Teamwork

Sport and student activities taught me to work with others.

Project: Expense Calculator

PROJECT 001 / MOBILE APP

Expense Calculator

A mobile app built with Flutter and Dart as a practical exploration of app structure, interface design and programming fundamentals.

THE GOAL

Make everyday expense tracking feel approachable and easy to scan.

TOOLS & FOCUS

Flutter SDK

Dart

Mobile UI

WHAT I LEARNED

- 1 Structure**
Organising an app into understandable parts.
- 2 Interface**
Presenting information in a clear, usable way.
- 3 Iteration**
Treating a first version as a starting point, not the finish line.

Achievements & recognition

TOP 25

Aditya Birla selection

NATIONAL

Research recognition

SILVER

Basketball medal

01

Aditya Birla Fashion Industry

Selected among approximately 50,000 students and placed in the top 25 through a competitive selection process.

02

Research on mental health & the SDGs

Received national-level recognition for a research paper connecting mental health with the United Nations Sustainable Development Goals.

03

Student leadership

Selected as Junior Head Boy through an interview process, building a foundation in responsibility and leading by example.

04

Model United Nations

Participated as an MUN speaker, researching issues, developing arguments and presenting ideas in a formal forum.

05

Olympiads & knowledge quizzes

Participated in SOF Olympiads, the Aryabhata Maths Olympiad and the Bharat Ko Jano quiz.

06

Drama, hosting & basketball

Hosted school functions, took part in drama activities and earned a silver medal in a basketball tournament.

Skills & career direction

I'm building my technical foundation step by step. My aim is to become a capable software engineer who can combine sound fundamentals with thoughtful product design.

TECHNICAL

- Python fundamentals
- Flutter SDK & Dart
- Mobile UI concepts
- GitHub / project documentation

TRANSFERABLE

- Research & critical thinking
- Public speaking
- Teamwork & collaboration
- Creative problem-solving

WHERE I WANT TO GO

01 Strengthen fundamentals

Develop stronger skills in programming, data structures and problem-solving.

02 Build practical projects

Create useful applications, learn from feedback and document the process.

03 Explore AI & machine learning

Understand the foundations before applying them to meaningful problems.

MY APPROACH

Learn with intent. Build with care. Improve through feedback.

What I'm working towards

Learn fast.

Build real.

Stay curious.

I see this portfolio as a record of progress rather than a finished statement. I want to keep learning, make more projects, seek feedback and work with people who enjoy solving challenging problems. My current focus is on developing strong computer science fundamentals and turning that learning into practical, well-made software.

A FINAL NOTE

The achievements in these pages matter to me, but so does the work behind them: showing up, asking better questions, learning from mistakes and staying open to new ideas. I'm excited to see what I can build next.
